Email: kaifmd197@gmail.com

Mobile: +91-8294335198

SKILLS

Languages:	Java C++ Python JavaScript C
Frameworks & Libraries:	Node.js Express.js Socket.io FastAPI Flask Leaflet.js
Tools & Platforms:	Git GitHub Vercel Render Railway Power BI OpenCV
Databases:	MongoDB MySQL SQL Server
Concepts:	OOP DSA DBMS OS Computer Networks

PROJECTS

LocalFix — Full-Stack Service Marketplace [GitHub](#) | [Live Demo](#) Mar 2026 – Present

- Architected a production-ready, multi-role service marketplace (User + Worker) with Node.js/Express.js REST API, JWT-based authentication, and Nodemailer OTP email verification achieving ~95% delivery success rate.
- Engineered real-time booking engine using Socket.io (WebSockets) — workers receive live job requests with auto-timeout logic and targeted real-time communication using Socket.io rooms; integrated Razorpay payment gateway for end-to-end transaction handling.
- Developed GPS-based worker discovery using MongoDB geospatial queries and Haversine distance formula for 100m OTP proximity verification; integrated Leaflet.js for live worker location tracking on interactive maps.
- Shipped Aadhaar-verified dual-role auth system with bcrypt password hashing, worker ID verification, arrival OTP handshake, and wallet/earnings management — deployed frontend on Vercel and backend on Render.

Tech Stack: Node.js | Express.js | MongoDB | Socket.io | JWT | Razorpay | Leaflet.js | Nodemailer | Vercel | Render

AI Image Detector — CNN Binary Classifier [GitHub](#) | [Live Demo](#) Oct 2025 – Dec 2025

- Designed a binary image classifier using CNN + EfficientNet transfer learning trained on 70,000+ images, achieving ~92% validation accuracy to distinguish AI-generated vs. real images.
- Deployed end-to-end ML pipeline covering data preprocessing, model training, and real-time inference; hosted FastAPI backend on Railway with Framer-based frontend — reduced inference time to under 2 seconds per image.
- Optimized OpenCV-based preprocessing pipeline that standardized 70,000+ varied image inputs, improving training consistency and reducing dataset noise by ~15%.

Tech Stack: Python | FastAPI | CNN | EfficientNet | Transfer Learning | OpenCV | Railway | Framer

Mira — Gen Z AI Chatbot [GitHub](#) | [Live Demo](#) Jul 2025 – Sep 2025

- Built a conversational AI chatbot powered by Groq API with LLaMA 3.3 70B model, delivering low-latency AI responses with a Gen Z-oriented personality and tone.
- Integrated Groq's high-speed inference API achieving sub-second response times; launched full-stack application on Vercel with a custom frontend interface.
- Crafted context-aware conversation flow with session management, enabling multi-turn dialogue and dynamic prompt engineering for consistent personality behavior.

Tech Stack: JavaScript | Groq API | LLaMA 3.3 70B | Vercel

CERTIFICATES

• Java Certification HackerRank	Mar 2026
• OpenCV Bootcamp OpenCV University	Jan 2026
• Build Generative AI Apps Infosys	Sep 2025
• Data Analytics Deloitte	Jul 2025
• Fundamentals of Network Communication IBM	Sep 2024

ACHIEVEMENTS

- Ranked 3958 / 28,000+ in LeetCode Biweekly Contest 179 (Top 15%) with a contest rating of 1710.
- Solved 250+ DSA problems on [LeetCode](#).
- Achieved 5★ (Gold) in Java and 3★ in C++ on [HackerRank](#).
- Recognized as Top 3 performer in DSA Summer Training Program at Lovely Professional University.

EDUCATION

Lovely Professional University	Punjab, India
B.Tech Computer Science & Engineering CGPA: 6.7	Since Aug 2023
Subhash Public School	Giridih, India
Intermediate Percentage: 81%	2022
Honey Holy Trinity School	Giridih, India
Matriculation Percentage: 86%	2020
